Matthew E. Quenneville

UC Berkeley Department of Astronomy
301B Campbell Hall
Berkeley, CA

Website: mattq.ca
Email: mquenneville@berkeley.edu
ORCID: 0000-0002-6148-5481

Research Interests

Galactic dynamics; orbit modelling; supermassive black holes; galaxy formation and evolution

Education

Ph.D. Physics, UC Berkeley — *Expected* May 2022
Advisor: Chung-Pei Ma
Thesis: Dynamics and Shapes of Galaxies:
Orbit Modelling of Triaxial Galaxies Hosting Supermassive Black Holes

B.Sc. Honours Mathematical Physics, Simon Fraser University — Jun. 2016
Advisor: David Sivak
Thesis: Energy Dissipation and Information Flow in Coupled Markovian Systems

Research Positions

Graduate Student Researcher, UC Berkeley — 2018-present
Advisor: Chung-Pei Ma
Topic: Dynamics and Shapes of Massive Elliptical Galaxies

Honours Thesis, Simon Fraser University — 2015-2016
Advisor: David Sivak
Topic: Energy Dissipation and Information Flow in Coupled Markovian Systems

Undergraduate Researcher, Canadian Institute for Theoretical Astrophysics (CITA) — Summer 2015
NSERC USRA
Advisor: Ue-Li Pen
Topic: Using pulsar scintillation and VLBI to study the Crab Pulsar

Institute of Particle Physics Summer Student Fellowship, CERN — Summer 2014
SFU Vice-president Research USRA
Advisor: Dugan O'Neil
Topic: Measuring the Higgs boson mass in decays to tau leptons with machine learning

Undergraduate Researcher, Simon Fraser University — Summer 2013
SFU Vice-president Research USRA
Advisor: Dugan O'Neil
Topic: Reconstructing decay products of tau leptons with machine learning

Advising Experience

Shaunak Modak 2020-2021
Testing Schwarzschild Orbit Models for Black Hole Mass Determination with Mock Datasets
Undergraduate Honors Thesis
Co-supervised with Chung-Pei Ma

Teaching Experience

Graduate Student Instructor, UC Berkeley Fall 2016
Physics 7B: Physics for Scientists and Engineers Spring 2017
Fall 2017
Spring 2018

Telescope and Computing Allocations

As Co-Investigator:

- **Keck Observatory** (PI: Chung-Pei Ma) 2019A-2021B — 6.5 nights
- **XSEDE San Diego Supercomputer Center** (PI: Chung-Pei Ma) 2019-2021 — 3,702,490 SUs (+1,872,000 pending)

Research Skills and Experience

Observational:

Photometry:	Data reduction; processing (ARCHANGEL); fitting (Imfit, GALFIT, MGE)
Galactic Kinematics:	Voronoi binning, spectrum fitting (pPXF)
Catalogs:	2MASS XSC, WISE, 2MASS PSC
Observing:	Keck Observatory, Algonquin Radio Observatory

Technical:

Programming:	Python; Bash; Fortran
Code Development:	Git; supercomputing clusters (SLURM and Torque schedulers)
Software:	LaTeX; Mathematica
Statistics:	MCMC sampling; Bayesian statistics; information theory; machine learning

Talks

- NRC Herzberg DAO Colloquium — *Upcoming* Nov. 2021
- CITA Cosmology Group Meeting — *Upcoming* Nov. 2021
- UC Berkeley Graduate Student Postdoc Seminar — Oct. 2021
- UC Berkeley Astro 250 Special Topics - Guest Lecture — Sept. 2021
- UC Berkeley Physics Graduate Student Seminar — Dec. 2018
- SFU Honours Thesis Presentation — Apr. 2016
